FUND MANAGER COMMENTARY

In January 2025, IDR China India Indonesia Equity fund. Equity Fund booked -0.54% performance, below the benchmark performance. By sector inside MSCI Indonesia, Financials was the largest positive contributor, while Materials was the largest negative contributor. Last month, Global equity market rose moderately in January 2025. Among the major Markets, Brazil and Euro were the best performers while Indonesia, India and China were the weakest. Eurozone dataflow continues to lag the US, and the trade uncertainty is likely to dampen international business confidence. China's 4Q GDP y-y came in at 5.4%, notably above Wind consensus of 5.1%. December 2024 data showed an uptick in economic activity, including IP, exports and retail sales. China stimulus is so far mostly monetary in nature, it is likely not yet a game changer to counter structural growth headwinds. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
