FUND MANAGER COMMENTARY

In January 2025, IDR Growth Equity Syariah booked negative performance of -3.99% mom, below the benchmark performance. While global equity market was generally positive, Indonesia equity market was mixed with syariah equity indexes (ISSI & JII) and some conventional equity indexes (IDX80 & LQ45 index) booked negative return while MSCI Indonesia & JCI was slightly positive. Materials were the largest negative contributor in Indonesia equity market including Syariah equity market in January 2025. Foreign investors continued their selling spree in January 2025 as they recorded another net outflow amounting to -Rp3.7tn. Going forward, upon recent clarity on new US tariff implementation and the retaliatory tariffs by the other countries, equity market volatility may remain high. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such current market weakness and the attractive market valuation (-2SD below mean) could offer a good market entry opportunity with an attractive risk-reward.
