In March 2025, USD Prime Global Equity Fund booked negative performance of -4.65% mom, below the benchmark performance. Last month, Global equities dipped again in March 2025 for the second consecutive month and ended 1Q 2025 in negative territory. For March 2025, across the major geographic regions in USD terms, India equities led, while US equities lagged. On the US macro front, a concerning mix of stuttering growth and rising inflation is fueling fears of stagflation. During March, China market inched higher ahead of the US' tariff decision on 2nd of April 2025. China's manufacturing sector continued to expand as the China manufacturing PMI was in expansionary territory for the second consecutive month in March 2025. Going forward, equity market will continue to depend on the development of global and domestic factors such as development on global inflationary pressure and subsequent policy reaction, global economic growth, and geopolitical situation.
