Fidelity Global Multi Asset Income Fund A-Acc MF  
TD + Cash

### FUND MANAGER COMMENTARY

In January 2025, the fund generated positive return of +1.52% mom, primarily driven by a bounce back in the global equity market. The fixed income market also recovered in tandem with the improvement in global equity market. EM debt did well attribute to the Brazilian bonds. Fund managers are still positive on the global equity market and look to add position in the US market. Last month, Global equity market rose moderately in January 2025. Among the major regions, Brazil and Euro were the best performers while India and China were the weakest. Eurozone dataflow continues to lag the US, and the trade uncertainty is likely to dampen International business confidence. China's 4Q GDP y-y came in at 5.4%, notably above Wind consensus of 5.1%. December 2024 data showed an uptick in economic activity, including IP, exports and retail sales. China stimulus is so far mostly monetary in nature, it is likely not yet a game changer to counter structural growth headwinds.
