FUND MANAGER COMMENTARY

In January 2021, IDR Equity Syariah Fund booked performance of -4.10% mom, slightly above the benchmark performance. By sector inside JII, Materials was the largest positive contributor (0.9% mom), while Consumer Staples was the largest negative contributor (-2% mom). In last month, global equity market saw a mixed performance in which most markets rallied in the first half of the month driven by blue sweep on US Senate election and the early phase of vaccination in several countries. However, in the later half of the month, market was corrected due to increasing concern on the new Covid19 variants. Domestic market also followed the same pattern with the addition of amplification from the usage of leverage by retail investors and the subsequent unwinding of those leverage. Going forward, Indonesia equity market will continue to depend on the development of global and domestic Coronavirus event, including number of cases, treatment and vaccines, and policy reaction including healthcare policy, stimulus, and support through recovery until post-Covid19 period.
